## 3M™ Dichroic Glass Finishes DF-PA

### Inspiring a new spectrum of creativity

The colour-shifting effect of dichroic glass is a magnificent addition to any space, but can also add substantial cost to a project. With 3M Dichroic Glass Finishes, the same brilliant effect can be achieved, with colour shifting depending on the viewer's angle, plus simple application and at a fraction of the cost.

Made of premium materials, the shimmering textures are available in warm and cool tones. Want to create a completely new effect? Depending on the substrate, viewing angle and your choice of ambient or special lighting, 3M Dichroic Glass Finishes can take on a completely different look, defining your space in an altogether original way.

Just what you'd expect from 3M Architectural Markets, where state of the art meets high design.

#### Features

- Dichroic Blaze Glass Finishes shift between warm tones of cyan/blue/magenta and red/gold
- Dichroic Chill Glass Finishes shift between cool tones of blue/magenta/yellow and gold/blue
- Non-metallic, non-conductive and non-corrosive
- A premium-grade, polyester film designed for interior glass application
