

ImagePerfect™ 7600

Coloured Films, Transparent (IP 7618 - IP 7624)

ImagePerfect™ 7600 transparent films will enliven interior glazing by adding a touch of matt colour.

When applied to glass, the ImagePerfect™ 7600 transparent matt (satin) films create a coloured hue without diminishing the transparent properties of the glass. The IP 7600 transparent matt colours are not as transparent as the IP 7600 transparent gloss colours and this higher degree of opalescence, whilst still allowing most natural light to pass through, creates subtle lighting conditions and a degree of privacy. The touch of colour provides a contemporary look that will enliven any interior glazing, including windows and partition screens. They will be used in corporate and commercial environments, such as meetings rooms, conference facilities and lobbies, as well as retail environments and lifestyle business locations, such as hotels, theatres and restaurants. They utilise a high-quality PET film with high optical qualities and a hard, scratch-resistant surface for durability and ease of maintenance during window cleaning. They must be wet applied.

Attention: Do not clean for at least 1 month after application and do not apply any type of sticker or adhesive on the film.

Specifications	
Description	Polyester
Installation	Interior
Colour from the outside	7 transparent matt colours
Thickness	60mym
Adhesive	Solvent-based acrylic, permanent
Durability (unprinted)	7 years
Flame Retardancy	M1
Shelf Life (at -5°C to +40°C)	3 years
End of Life / Disposal	N/A
