SIGN PRODUCTIVITY THAT IMPRESSES

THE ORIGINAL SIGNMAKING FLATBED APPLICATOR

THE SUPER-FAST ROLLSROLLER® FLATBED APPLICATOR PRODUCTION METHOD ELIMINATES SEVERAL TIME CONSUMING STEPS FOR SIGN MAKING AND PRINT FINISHING IN MOUNTING, LAMINATION AND PRE-MASKING. ROLLSROLLER® Flatbed Applicator has revolutionized the finishing work of many sign makers.

Using manual processes for sign making can make it difficult to meet your customer's growing demands. Many of the manual procedures are strenuous, time consuming and demanding – and results can vary. ROLLSROLLER® Flatbed Applicator gives you perfect results in a third of the time. Change to the ROLLSROLLER® production method today.

APPLICATION AREAS

MOUNTING

ONE OPERATOR CAN MOUNT LARGE FORMAT digital print and self-adhesive film to many substrates like acrylic, rigid boards, corrugated plastic, metal plate, banners and glass. The flatbed gives you complete control over positioning and produces a result free from bubbles and creases.

LAMINATION

DESIGNED FOR COLD FLATBED LAMINATION OF digital prints and signs, by using pressure sensitive lamination film direct from roll or sheet by sheet for minimum waste. Heat assist roller is available as option.

PRE-MASKING

IT ENABLES A SINGLE PERSON TO APPLY transfer tape to cut vinyl graphics from the built in tape roll holder.

WORK TABLE

YOU NEED NO FURTHER CUTTING TABLE. ROLLSROLLER® will become your new work table, with a unique and self-healing cutting mat.

See the ROLLSROLLER® in action: www.rollsroller.se/our-products/how-to/

INCREASE YOUR PROFITS

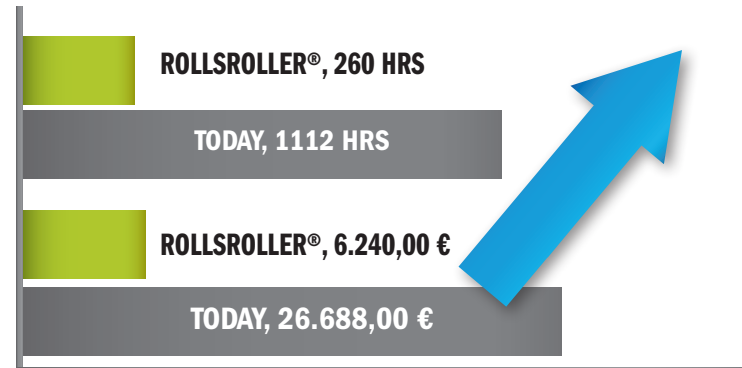

WANT TO SEE HOW MUCH TIME AND MONEY YOU CAN SAVE?

While getting access to a technology that will revolutionize your entire work process?

- Consistent high quality
- Great time savings
- Ergonomic and easy to use, does not require specialized personnel to operate.
- Fewer reproductions

AN EXAMPLE

EXAMPLE OF TYPICAL SIGN COMPANY CHANGING TO ROLLSROLLER® PRODUCTION METHOD™ SAVES €20.448,00 = 852 HRS PER YEAR.

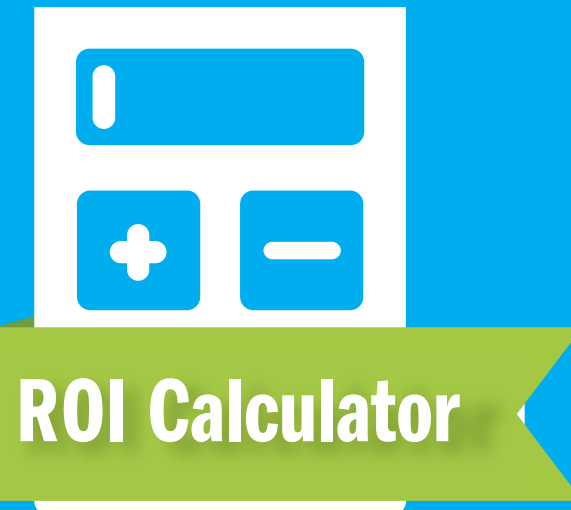

CALCULATE YOUR ROI

WANT TO SEE HOW MUCH TIME AND MONEY YOU CAN SAVE?

The ROLLSROLLER® ROI Calculator easily calculates how much you earn on replacing your traditional approach to the unique ROLLSROLLER® Flatbed Applicator method.

ROI Calculator

CAN YOU AFFORD NOT TO?

“THE ROLLSROLLER® IS DEFINITELY WORTH THE INVESTMENT”

“WE BOUGHT OUR ROLLSROLLER® IN THE AUTUMN OF 2008, AND MY ONLY REGRET IS NOT BUYING IT YEARS AGO.”

It saves time, makes the job easier, and is simple to operate alone. I took on a new employee a while ago, and after just a couple of hours she was applying letters to a four-by-ten-metre (13 x 33 ft.) sign as if she'd been doing it all her life. I used

to have a different laminator which cost about half as much as the ROLLSROLLER®. But ever since I saw the ROLLSROLLER® at Sign Scandinavia in 2006, I've been tempted to buy one. Now I can say that although it's significantly more expensive, it's worth the price. I can't imagine being without it.”

Tommy Jonsson
CEO, Tibro Reklamateljé, Sweden

CUSTOMER TESTIMONIALS

Signmakers worldwide are increasing productivity and profits by taking advantage of the ROLLSROLLER Production Method. Tommy Jonsson at Tibro Reklamateljé is one of them. Read more testimonials at: www.rollsroller.se/our-products/testimonials/

CHOOSE THE RIGHT ROLLSROLLER®

26 DIFFERENT STANDARD MODELS

IT'S EASY TO FIND THE RIGHT ROLLSROLLER FOR YOUR NEEDS. There are four* models: ENTRY, REGULAR, PREMIUM and INVENTOR EDITION. The main difference between them is the **size of the working area and the accessories included.**

ENTRY is your first step in to the unique ROLLSROLLER production method. It's the perfect option if you have limited space and don't need any additional equipment. Both REGULAR and PREMIUM have illumination (LED) as standard, where PREMIUM also has side trays for big banner side feeding, more accessories and modifications available.

*Actually, there are five models. The fifth model, TRAFFIC, is specially designed for making road signs. For more information about this model, visit: www.rollsroller.se/traffic

ALWAYS START BY ASKING YOURSELF SOME IMPORTANT QUESTIONS

- WHAT SIZE SIGNS DO YOU MAINLY WORK WITH?
- WHAT MEDIA WIDTHS DO YOU USE?
- WHAT WIDTH CAN YOUR PLOTTER OR PRINTER PRODUCE?
- HOW WILL YOUR NEEDS DEVELOP OVER TIME?

Answering these questions will help you choose the right model for you. Read more at www.rollsroller.com

NEED ADVICE? WE CAN HELP YOU

Visit: www.rollsroller.com/our-products/how-to/

and fill in your details and our experts will contact you.

LET ROLLER®
INVENTOR EDITION TAKE
YOUR SIGN COMPANY TO
THE NEXT LEVEL.

PRODUCTION CAN START QUICKLY

- Fast ROI.
- Profitable.
- Easy to learn.

FLATBED APPLICATOR DOES THE
JOB IN A THIRD OF THE TIME

- Increased capacity
- Shorter delivery times
- More times for sales and customer care.

PERFECT RESULTS EVERY TIME

- Higher quality – no more bubbles and creases-Less wastage.
- Consistent high quality – every time.

ERGONOMIC WORK POSITION

- Better ergonomics.
- Less strain on the body
- Less sick leave.

ROLLSROLLER®
TRAFFIC

ROLLSROLLER® TRAFFIC is designed for road sign production with high volumes of guide signs. It has a special profile bed adjustable to fit almost any extruded guide sign panels. Bed surface consists of 40x40/1,57in aluminum profiles. When working with application tape and over-lay film ROLLERTRAFFIC Entry, Regular or Premium is recommended to create a complete workflow.

THIS IS INCLUDED

ROLLSROLLER® Traffic Flatbed Applicator; Pneumatically controlled roller which is automatically adjusted for substrates up to 60 mm (2 2/5in); Adjustable aluminum profile bed (special design for mounting onto high volume of Guide sign panels); Roll holder on glide beam for pre-masking tape and laminate; Roll holder on bed end for printed or cut film; Stop static kit (cord and magnet) to dissipate static electricity; Casters (lockable); Machine feet; Owner's manual.

ROLLSROLLER® CUSTOMIZED

THERE'S A ROLLER® FOR EVERYONE

Can't find what you need in our standard range?
Don't worry, we can customize and create a Flatbed Applicator according to your specific requirements and needs! The unique ROLLER® construction offers models that produces perfect quality up to 10,8m and 2,2m wide as standard.
But we can also customize a ROLLER® that suits your needs. During our 20 years+ experience we have created many customized and uniquely designed ROLLER®Flatbed Applicators. Our team of sales staff, engineers and technicians can support from idea to installation and training.

REASONS TO GET A CUSTOMIZED ROLLER FLATBED APPLICATOR:

- Gives you the possibility to work with special sized materials (media, boards, aluminum/steel plate, acrylic etc..)
- Better overview of big signs when laid down on the flatbed
- Create more and bigger workstations in one machine
- Customize features, accessories and options to optimize your workflow

IMAGINATION IS THE ONLY OBSTACLE

So, let's think outside the box and let's put your need in front!
Remember, everything is possible! There's a ROLLER for everyone!

#ROLLER

5 REASONS TO CHOOSE ROLLSROLLER®

1. THE ROLLSROLLER® FLATBED APPLICATOR WAS INVENTED BY A SIGN MAKER

WE INVENTED THE FLATBED APPLICATOR TECHNOLOGY because as sign makers, we needed a more efficient work process. The ROLLSROLLER® Flatbed Applicator was devised from a user perspective: it facilitates production and solves real-life problems. Thanks to a variety of accessories and modifications, you can rest assured that it will satisfy your specific requirements. Because we use the ROLLSROLLER® in our own daily production, we have a unique understanding of industry challenges and needs – and the ROLLSROLLER® is the living proof.

2. WE SET THE STANDARD. THE ROLLSROLLER® HAS SET THE QUALITY STANDARD FOR FLATBED APPLICATORS

– and that didn't happen by accident. Since we invented the method and technology, it has undergone a natural development based on our customers' requirements and specific problems as well as our own 30-year experience as sign makers. The ROLLSROLLER® Flatbed Applicator is manufactured from start to finish at our factory in Karlstad, Sweden – from the welding of the steel chassis to final assembly and testing. Keeping the whole production process in-house gives us full control over quality and greater flexibility with regard to design changes, customisation and product improvement.

WHY THE ROLLSROLLER® TRAVERSE/GANTRY MAKE YOUR FLATBED APPLICATOR STAND OUT FROM OTHERS!

THE ORIGINAL

ROLLSROLLER®
FLATBED APPLICATOR

4. PRODUCT DEVELOPMENT SINCE 1995

ROLLSROLLER® FLATBED APPLICATOR IS A FLEXIBLE and reliable tool that can be used for a large variety of jobs every day. This is because we have continuously developed the materials and components over more than 30 years. For example, there's a good reason why the chassis and beam are made completely out of steel: steel does not deform over time, even if the underlying surface is uneven. The roller has reached its fifth generation, and is designed to have optimal surface properties for the material being used. Based on our long experience and in close dialogue with customers, we have added new functions such as a height-adjustable table, cutting devices and our Contact Cleaning System.

5. THERE'S A ROLLSROLLER® FOR EVERYONE

THE ROLLSROLLER® COMES IN A wide range of models specially designed to give you multiple options. We want everybody to find their ideal ROLLSROLLER®. We offer a wide selection of flatbed applicators: sizes and prices and many add-on options. It all depends on your needs. What size signs do you work with? What media widths do you use? What do you need to make your work even easier? What are your future needs? In addition, we can customise the ROLLSROLLER® to suit your needs. We have created many unique machines in consultation with our customers. There's a ROLLSROLLER® for everyone – and if your model doesn't exist, we can create it.

3. THE ROLLSROLLER® REVOLUTIONISES YOUR WORK

THE ROLLSROLLER® WILL SIGNIFICANTLY RAISE YOUR PRODUCTIVITY allowing you to take many more jobs and offer shorter delivery times. In addition, you will have more time left for other things such as organising and scheduling your staff's work. In fact, many customers see it as a competitive disadvantage not to use ROLLSROLLER® Flatbed Applicator, since it provides such an enormous head start on companies who still use traditional working methods.

WE ARE SIGN MAKERS AND BUILD MACHINES WE LIKE TO USE OURSELVES

1. THE TRAVERSE/GANTRY MAKES YOU WORK ERGONOMICALLY. When leaning over the table surface with sensitive self-adhesive material you can hold on to the ROLLSROLLER® glide beam. **2. THE OPERATOR CAN WORK FROM ALL FOUR SIDES** The operator is in total control and also saves time. **3. SIZE OF THE TABLE DOES NOT MATTER.** The ROLLSROLLER® glide beam produces perfect quality up to 10,8m and 2,2m wide as standard. **4. MORE POWER USING LESS MUSCLES.** The glide beam moves very smooth and easy. **5. LARGER WORK AREA ON THE MACHINE.** Greater opportunity to utilize the table size. **6. THE TRAVERSE GIVES YOU POSSIBILITY TO ADD ACCESSORIES** A great place for anti-static equipment and magnetic accessories such as Long reach cutter, scissors, knives and other options. **7. THE TRAVERSE MAKES THE MACHINE STABLE AS A ROCK** Solid and proven steel construction. Over 11 000 units installed globally. **8. DOUBLE THE EFFECTIVITY!** Add an extra ROLLSROLLER® glide beam – **9. THE ROLLSROLLER® GLIDE BEAM ALLOWS OPTION TO INCREASE HEIGHT OF THE ROLLER.** The gap between the roller and the table top accommodates different substrates up to 110mm /4,5 in.

ROLLSROLLER® SUCCESS STORIES

ROLLSROLLER® SUCCESS STORIES

is our customer's unsolicited words about introducing ROLLERFLAT® Flatbed Applicator in their work process. Everywhere in the world signs are made. Big and small. With ROLLERFLAT® Flatbed Applicator the daily work for many sign makers has been revolutionized. Every sign maker has their own experiences and stories to tell about how their daily work has been changed with ROLLERFLAT®.

Why did they choose ROLLERFLAT®? How has their daily work changed compared to previously? They all share one thing in common. By introducing ROLLERFLAT® production method into their workflow they save time, lots of time.

Read three ROLLERFLAT® users Success Stories, our customer's unsolicited words about introducing ROLLERFLAT® in their work process.

THE BUILD QUALITY IS THE BEST IN THE BUSINESS.

"This is our new premium ROLLERFLAT table! We shopped around and nothing comes close to the original ROLLERFLAT application table! The build quality is the best in the business!"

THIS IS A TOOL THAT WILL SAVE YOU TIME AND MAKE YOU MONEY!"

Greg Painter. FAST SIGNS, USA

THANKS ROLLERFLAT! THE ROLLERFLAT WILL HELP US TO ACHIEVE ANOTHER GREAT SERVICE FOR OUR CUSTOMERS

"Here at Signline Qld we are always looking at ways to improve our services for our long-standing and new customers. The ROLLERFLAT Premium 540/170 will help us to achieve another great service for our customers."

THANKS ROLLERFLAT!"

Rick Burrell
SIGNLINE QLD, AUSTRALIA

WE PURCHASED THE LARGER ROLLERFLAT® PREMIUM 540/220 (6FT X 18FT) MODEL TO BE ABLE TO DO LARGE POLYCARBONATE BACK LIGHTED FACES, ALONG WITH ALL THE SMALLER PROJECTS. THE ROLLERFLAT® HAS INCREASED OUR PRODUCTION DRAMATICALLY WHILE AT THE SAME TIME REDUCING MISTAKES AND IMPROVING QUALITY.

"The machine is easy to use, and within a few hours after installation and training, we were in full production. We estimate that the Payback Period for us was ONE YEAR easily. We are now to the point where we need to purchase another ROLLERFLAT® and have put it to the top of our list for next year's budget."

IT TRULY IS... THAT GOOD.

BARTUSH SIGNS
Washington USA

WE USE THE ROLLERFLAT® FLATBED APPLICATOR (APPLICATION TABLE) FOR ALL ASPECTS OF OUR PRODUCTION. FROM BASIC PREMASKING, TO LAMINATING, TO MOUNTING.

We purchased our first 10' table a ROLLERFLAT® 340/145 Basic about 2 years ago. Our production speed and capacity instantly grew. We purchased our 2nd 12' table a ROLLERFLAT® 400/145 Basic 1 year later.

"I CANNOT RECOMMEND THIS TABLE ENOUGH.

It truly makes every job easier to manage and faster to produce. This is by far the best piece of equipment we have purchased."

Tal Kasimov
VINYL XPRESS INC. Concord, Ontario

ROLLSROLLER® FROM KARLSTAD TO THE WORLD

ROLLSROLLER HAS BEEN MANUFACTURING FLATBED APPLICATORS IN KARLSTAD, SWEDEN FOR OVER 20 YEARS. GÖRAN JOHANSSON IS AN INVENTOR AND CEO OF THE COMPANY, AND ROLLSROLLER HAS SUPPLIED 9,000 FLATBED APPLICATORS TO 50 COUNTRIES.

“I originally intended to start a welding and assembly business, but ended up starting a sign making firm with my brother by chance. That was in 1988, and I’ve remained in the sign industry ever since,” says Göran on the origins of ROLLSROLLER, now a global company that exports over 98 percent of its products to customers worldwide. However, the road that led to the ROLLS-ROLLER – the flatbed applicator sold daily on the export market – hasn’t been without twists and turns.

“I built the first prototype for the company’s own use in the autumn of 1995. It worked as magnificently as a Rolls-Royce, so was named the Royce Roller. I later changed the name to ROLLSROLLER, and my patent agent checked with Rolls-Royce to see whether they had any objections. After nearly a year of pondering, they finally replied: it was OK for us to use the name because the product was so far removed from the automotive industry. We had slightly more problems with our latest trademark, Roll-X, a multi-purpose applicator. Watch manufacturer Rolex sued us in a Canadian court – but they lost.

Göran’s journey as an entrepreneur has been characterised by finding opportunities in the situations he’s been in. Like his father, he began his career working with paper machines, before founding Reklamidé AB in 1988. After a number of years he faced a dilemma. Reklamidé had grown thanks to the success of Göran’s second patent, the “EZ-System”, which was launched in 1994 and had started getting large orders. When Q8 Petroleum ordered new signs on a very tight schedule, Göran got to work and developed the world’s first flatbed applicator.

“I welded together a table measuring 5.4 by 2 metres and spread a Forshaga linoleum sheet on top of it. I got the roller from a local company, and I used valve springs from a Volvo B20 to create the correct roller pressure – approximately 2 kilos per square centimetre – needed to get the adhesive agent to react with the substrate. This principle still applies for most film materials

ROLLSROLLER®
FLATBED APPLICATOR

today.

SEVERAL PATENTS “Because of my background in the paper machine industry, I was very familiar with rollers and moving arms. I had always built machines, from the time when I used to build mopeds and mini bikes and later motorbikes (Harley Davidson frames and handlebars). I noticed that when I was under pressure to meet deadlines and large orders, I would naturally start thinking up ideas to make the work easier. The idea for my third patent came about in the autumn of 1995. It was a simple idea that involved putting a mobile roller lengthwise on a large table. The result was the world’s first flatbed applicator – the ROLLSROLLER.

In addition to the ROLLSROLLER, which has the traverse on top, I invented the Roll-X three years ago, which has the traverse underneath. Jesper Lundkvist and David Jansson installing the electronics. “At that time, my only thought was to invent a machine that would speed up our own sign production. We were in a hurry to deliver some large orders that we’d received thanks to our EZ System. The machine enabled us to work in a completely different way, without using soapy water. Application on the substrate could be done much faster and more easily, and a better quality finish was achieved.

LARGER SCALE PRODUCTION The idea was born to make more ROLLSROLLERS. Göran continued refining the design and applied for a patent in 1996. “I was already quite experienced at applying for patents. My first patent was granted back in 1986 when I worked in the paper machine industry. My second patent application was for the EZ-System, so it was natural that we should aim to keep the ROLLSROLLER patent as a product in Reklamidé AB, which was a small company back then. The patent was granted and we could start manufacturing the ROLLSROLLER on a larger scale. “Initially we produced the ROLLSROLLER in parallel with our flex face signs, and in 1997 and 1998 we would suspend our sign production every four weeks in order to manufacture ROLLSROLLER machines. At that time there were five of us in the company and I hadn’t decided yet: Would we become northern Europe’s greatest sign maker? Or would we focus on flex face technology, which we were also good at? Or would we focus on the ROLLS-ROLLER?”

A SEPARATE COMPANY “In the end, a separate company was formed for the ROLLSROLLER, with its own business concept and an international orientation. I should also mention that in 1998, other employees at the company made modifications to the design, some of which are still used in our premium models today. My role in the process was to ensure compliance with certain technical design specifications, which were partly to do with achieving an even balance between the floor and the board.

Because Göran and his team also continuously work with their own sign production, they know how a flatbed applicator needs to work, from the way the traverse moves to how to adjust the working height or tilt the table to optimise the work.

INVESTING IN ROLLSROLLER AB was clearly a sound choice: today the company has about 40 employees and sales of approximately MSEK 120, and supplies products to over 50 countries. There is no major trade fair in the world where ROLLSROLLER isn’t present. Even though there are several Chinese companies that make copies, Asia is becoming the fastest-growing market since the company conquered Europe, the USA and Canada. To supply the North American market with products, ROLLSROLLER has had a wholly owned subsidiary (the company’s own hub) in Toronto since 2011 covering 600 square metres of industrial space.

“THE ROLLSROLLER SAVES A LOT OF TIME. THIS HAS BEEN PROVED IN STUDIES FOCUSING ON TIME AND MATERIALS. AN AMERICAN CUSTOMER REPORTED THAT A JOB THAT USED TO TAKE AN HOUR NOW TAKES TEN MINUTES,” SAYS GÖRAN. “Another customer measured a 70 percent time saving. Yet another customer – in Nigeria, where the typical wage is only about SEK 20 a day – mentioned the difficulty of finding skilled workers and the high materials costs when something goes wrong. It takes two to three years to train a worker in manual application. The ROLLSROLLER shortens the time it takes to train workers and reduces the number of errors. Incidentally, this Nigerian customer has purchased several more ROLLSROLLER machines, including one for his brother who manufactures traffic signs in Sierra Leone.

COPIES OF THE ROLLSROLLER But let’s get back to Sweden. Göran explains that he owns the company with his family. “I’ve never needed an investment company. We’ve always remained in operation, and we’ve gradually grown with the help of our own cash assets. Last year we celebrated the company’s 30th anniversary and the fact that since starting we have delivered over 9,000 flatbed applicators. Today there are about ten companies making copies of the ROLLSROLLER. Despite this, we still expect to expand over the coming years and to increase our annual production of both the ROLLSROLLER and the Roll-X. It’s quite a paradox that ten years ago, when we held 100 percent of the market, we produced less than half as many machines per year as we do today.

“In 2004, me and my colleague Jørn Olsen got thinking that since we succeeded in selling roughly 300 ROLLSROLLERS in Sweden alone between 1997 and 2003, we would surely be able to sell ten times that quantity in Germany and the UK. In October 2004, Jørn and I drafted the first version of a business concept and a dealer price list. Then we started looking for dealers. We focused particularly on dealers selling film materials and machines for the sign industry, with the idea that selected dealers might use the ROLLS-ROLLER as a supplementary product. This has proved a sound strategy.

BUILT FROM SCRATCH But increased production requires more space. Room after room has been added to the premises outside Karlstad, where the company owns half a block covering 5,000 square metres of industrial space. When Sign&Print pays a visit, we meet employees who share Göran’s passion for machines and signs. Here people are hard at work welding, drilling, sawing, assembling and packing. Nearly all the products are built from scratch at the company’s own premises. The idea is to gradually increase production and perhaps take on more employees, both in Sweden and in other countries that the company sells to. The premises have been expanded and adapted to allow parallel production

of several flatbed applicator models. ROLLSROLLER’S RRTS Department (ROLLSROLLER Technical Service) is a dedicated team dealing with support, accessories, spare parts and service & installation worldwide. RRTS is also in charge of product development and production of customised and purpose-built products.

NEW CEO The most recent organisational change at RollsRoller AB was the appointment of Christian Ogenvall as the company’s new CEO. This left Göran free to deal with business development again. This was his passion in the 1990s, before his executive role required an increasing administrative focus. Göran’s two sons Christian and Marcus and their younger sister Maria are playing an increasingly active part in running the company. “My 30 years in the sign and graphics industry have been a long and fascinating – and sometimes difficult – journey. Out of the six patents I have applied for to date (there will be more), four have been granted and two have become best-selling products. The Rollroller’s production method has even become a global sales success. even become a global sales success.

ROLLSROLLER’S founder Göran Johansson with Sales Manager Per Wendel. “As the inventor of the flatbed applicator, I admit I’m proud and satisfied to see how our ROLLSROLLER and Roll-X machines are on the way to changing a global industrial discipline.

Now that I’ve resumed a more strategic management role, with a budget of over SEK 120 million, I feel the same excitement as when I used to work in technical development,” says Göran. In addition to working with product development, he has gone back to visiting trade fairs and has closer contact with customers.

“When our sales manager Per Wendel gets a big order and gives a high five in the office, I think to myself, that’s thanks to our business concept – and it feels amazing. Growing the business satisfies my need to always do things better. Maybe the road we take isn’t always the best one, but it takes us forward,” says Göran.

ROLLSROLLER®
FLATBED APPLICATOR

SELF HEALING CUTTING MATS

A UNIQUE ROLLSROLLER® SELF-HEALING CUTTING MAT

has been developed through many years according to our specifications and high demand for quality. It is designed for large scale cutting, to protect your work bench and your blades. The ROLLSROLLER® cutting mat is included in your new ROLLSROLLER® but can be used for all flatbed applicator brands and/or work benches.

A worn cutting mat or a mat of poor quality may affect lamination quality. Compared to other cutting mats on the market, the ROLLSROLLER® cutting mat guarantees that the substrate is even throughout the entire work table which is very important when using a Flatbed Applicator. Custom made original cutting mats can be used on any worktable and is available in any size.

Available to order online

THE ROLLSROLLER® ORIGINAL CUTTING MATS ARE TOTALLY FREE FROM PHTHALATE PLASTICIZERS.

PHTHALATES plasticizers are used to make the plastic soft and flexible and can, according to several studies, have a negative impact on human health and environment. To protect human health and environment ROLLSROLLER® have decided to only sell PHTHALATE-FREE cutting mats.

Our label “PHTHALATE-FREE” will give you the assurance that our soft vinyl is the best choice for human health and environment protection.

FEATURES

- Delivered oversized (when installed, the mat should be cut to exact worktable size)
- Maximum length 22 meter (72ft.)
- Custom made cutting mat is available in any size. Price is calculated based on length.
- Don't forget to replace your old cutting mat. A worn cutting mat may affect lamination quality.
- Our cutting mats can also be used to protect your regular cutting table.
- NON-PHTHALATE

MAKE PERFECTLY STRAIGHT CUTS

GREAT CUTTING EQUIPMENT FOR ROLLSROLLER® FLATBED APPLICATOR To improve and modify your ROLLSROLLER Flatbed Applicator. Make your job even easier.

EXC SAFETYRULER

A SAFETY RULER WITH ANTI-SLIDING PAD UNDERNEATH

and protection-bar for your hand. The ruler is made of low weight Aluminum and is equipped with a measuring tape/graduated scale (mm or ft.in.). The EXC SafetyRuler has a built-in slide-bar which allows you to upgrade with a Cutting head which makes it easier to cut perfectly straight. The Cutting head can be slid from one end of the Ruler to the other without falling out of the rails. This assures you an easy cut even through thicker panels. Cutting head EXC SafetyRuler, KNIFE & wheel version.

Get the most comfort and safety while cutting with less effort. The Cutting head can fast and easy be mounted and detached depending on the need. The design of the cutting head and SafetyRuler slide-bar assures you an easy and straight cut even through thicker panels (we recommend to not cut on aluminum-coated-panels)

CUTTING HEAD EXC SAFETYRULER,

KNIFE VERSION Easy to install and use together with the EXC SafetyRuler, Knife cuts exactly along the edge of the SafetyRuler. High safety when cutting.

CUTTING HEAD EXC SAFETYRULER,

WHEEL Easy to install and use together with the EXC SafetyRuler. Knife cuts exactly along the edge of the SafetyRuler. High safety when cutting. Recommended for cutting textiles and fabrics.

EXC KEENCUT EVO 3

THE ULTIMATE MANUAL CUTTER FOR WIDE FORMAT AND GRAPHIC MATERIALS.

Created for the busy print shop, the Evolution-E3 reduces errors and wastage to save you time and money. Upgrade your Flatbed Applicator Speeds up production- Double-tool head: single-handed cutting in both directions. Built for efficiency- Integral, linked lift & hold allows one operator to lift the complete cutter from either end for easy loading and positioning of media.

PERFECT FOR CUTTING

Semi-rigid materials. Cardboard PVC foam board. foam-centred board. corrugated plastic up to 13 mm .Mountboard and conservation board up to 3.5mm. Flexible polycarbonate up to 3mm. Flexible materials Tough materials, banners, pop-ups, magnetic sheets. Film and self-adhesive vinyls. Delicate materials: tissue paper, fabrics, wallpaper & textiles. Rigid material Cast acrylic or Plexiglas up to 3mm.

FEATURES

- The most accurate cutter on the market.
- For high volume production.
- Speeds up production.
- Saves workshop space.
- Versatile two-way cutting.
- Keeps wastage to a minimum.
- Safety by design.
- Minimal set-up.
- Simple and instinctive operation.
- Precision-engineered for immediate 'out of the box' accuracy.
- Guaranteed for 5 years

YOULIFTER® UNIVERSAL LIFTER

YOULIFTER® UNIVERSAL LIFTER DESIGNED TO HELP YOU WITH THE HEAVY WORK

The Youlifter® is an electrical lifter constructed and developed to create a better working environment and better ergonomics which will increase your productivity. The lifter fits perfect in the graphical sign production but also in other industrial environments where lift support is needed. Youlifter comes in three models: Youlifter 120P, Youlifter 90IE and Youlifter 60E.

VIEW VIDEO

ELECTRICAL LIFTER. ERGONOMIC REDUCE STRAIN INJURIES. REMOTE CONTROL. EXCELLENT MANEUVERABILITY.

YOULIFTER® 60E UNIVERSAL LIFTER

E-ECO. The E-Trolley is our smallest lifter, offering a very swift and flexible lifting trolley. The lifting capacity of this lifter is max. 60 kg / 132 lb. To ensure maximal safety the trolleys possess a built-in release function, which serves as protection from crushing injuries and prevents the trolley from tipping over. The tray design makes it possible to load/unload material from printers and is perfect for scooping up heavy material from your flatbed applicator.

YOULIFTER® 90IE UNIVERSAL LIFTER

IE-INDUSTRIAL ECO. The IE-trolley is our medium-sized lifter. A great compromise between the strong P-trolleys and the sleek E-trolleys. They're stable with a fully welded chassis, but are still "almost" as slim as our E-trolleys. They are capable of lifting up to max: 90 kg / 198 lb. To ensure maximal safety the trolleys possess a built-in release function, which serves as protection from crushing injuries and prevents the trolley from tipping over. The tray design makes it possible to load/unload material from printers and is perfect for scooping up heavy material from your flatbed applicator.

YOULIFTER® 120P UNIVERSAL LIFTER

P-PROFESSIONAL. The P-trolleys are the largest, most stable, powerful and flexible in the family. The trolleys are modular and easy to assemble. They are capable of lifting up to 120 kg / 264 lb. To ensure maximal safety the trolleys possess a built-in release function, which serves as protection from crushing injuries and prevents the trolley from tipping over. The tray design makes it possible to load/unload material from printers and is perfect for scooping up heavy material from your flatbed applicator.

ACCESSORIES TO IMPROVE AND MODIFY YOUR ROLLSROLLER®

Great accessories to improve and modify your ROLLSROLLER® Flatbed Applicator. To make your job even easier. Choose between many original accessories to improve your daily work.

CONTACT CLEANER HAND ROLLER

A HAND-HELD ACCESSORY THAT CLEANS ANY FLAT SURFACE. The contact cleaner hand roller is an ergonomic designed hand tool that picks up particles down to 1 micron (and below). The contact cleaner can be used to clean any flat surface and will pick up dry, unat-tached particles without damaging the surface or leaving anything behind. It will pick up dust, lint, hair, glass, metal skin and plastic particles. After rolling the part you want to clean, simply place the roller into the automatic cleaning station to refresh for next application.

Contact cleaner hand roller (part no 71029) includes Hand held roller (300mm/1ft.), Cleaning station and one cleaning adhesive roll with 60 sheets of cleaning paper. A great option is the extendable shaft that makes it more convenient and more ergonomic to reach across a large panel (part no 10443).

- ROLLSROLLER® WILL, WITH THE HEAT ROLLER, BECOME AN EVEN MORE VERSATILE TOOL.

MODEL NAME	DESCRIPTION/DIMENSIONS	PART NO.
Heat assisted roller, 170 Regular	40°C-60°C/104°F -140°F	50118
Heat assisted roller, 170 Premium	40°C-60°C/104°F -140°F	50103

HEAT ROLLER

HEAT ROLLER COMBINES THE ADVANTAGES OF FLATBED APPLICATION and our technology for a thermal roll with controlled consistent temperature around the roll mantle. The heated roller reduces the appearance of microbubbles (silvering) in the laminate and improves the adhesive activation, which mean faster delivery to customer. The roller temperature can easily be adjusted as needed; 40-60°C. The working temperature is shown on a display on the glide beam

EXTENDED ROLLER ADJUSTMENT

THE STANDARD HEIGHT BETWEEN THE ROLLER AND THE BED IS 60 MM (2.36 IN.),

The extended roller adjustment allows to increase the standard gap of 60 mm (2,36 in) to 110mm (4.33 in) and therefore capable of handling even higher/thicker materials.

On customer request we can also create an individual solution with which even higher / thicker materials can be processed.

MODEL NAME	DESCRIPTION/DIMENSIONS	PART NO.
Extended roller adjustment 150P	Enables substrates to 110 mm (4in.)	On request
Extended roller adjustment 170P	Enables substrates to 110 mm (4in.)	11092
Extended roller adjustment 220P	Enables substrates to 110 mm (4in.)	On request

CUSTOMIZED JIG

FOR TRAFFIC SIGN MANUFACTURING.

The Jig has a start and stop space next to the sign to create a support for the pressurized roller. The Jig is oversized to create a support for the pressurized roller when moving on and of the sign face.

MODEL NAME	DESCRIPTION/DIMENSIONS	PART NO.
Customized Jig	Customized for your sign standards. For traffic sign manufacturing	10528

GUIDE SIGN JIG

GUIDE SIGN JIG IS AN FLEXIBLE ACCESSORY THAT IS USED ON A ROLLSROLLER® with flatbed worktable (does not fit model Traffic). The Jig stays directly on the bed and creates a support when applying to bent metal plates and extruded panels like guide signs.

Custom size: Made to order with maximum length: 6 000 mm / 19ft. 8in

MODEL NAME	DESCRIPTION/DIMENSIONS	PART NO.
Guide Sign Jig 200/40	Length: 2 000 mm / 6ft. 6in. Width: 400 mm / 1ft. 3in.	10131

ROLLSROLLER® ACADEMY

WELCOME TO ROLLSROLLER® ACADEMY. Based on our long experience of sign making and our invention Flatbed Applicators, we guide you to a more simple and more efficient way of manufacturing signs.

HOW TO APPLY TRANSFER TAPE AND APPLICATION TAPE

Transfer tape applicator simplifies pre-masking. ROLLSROLLER® makes it simple to apply transfer tape and application tape by only one person.

Read more and view video:

www.rollsroller.com/our-products/how-to/apply-application-tape/

HOW TO MAKE FLEX FACE SIGNS

ROLLSROLLER® Flatbed Applicator allows producing a flex-face sign easily with only one person. You don't need any application fluids, forget about getting everything all wet. No more drying time, your sign face is ready to install in no time. One person can do over-sized sign faces even when you need to overlap the cutting film. Read more and view video:

www.rollsroller.com/our-products/how-to/make-flex-face-signs/
