

Avery Dennison®

MPI™ 2000 Series

Premium long-term solutions on slightly curved surfaces, including vehicle graphics

When you want digitally-printed, durable graphics that strike the right balance between performance and cost, the Avery Dennison® MPI™ Intermediate Films and their matching DOL overlaminates are ideal for applications lasting between 3 and 5 years.

These versatile films can be applied over all kinds of flat surfaces and even simple curves. Choose the option that best suits your needs: higher performance MPI 2000, or cost-efficient MPI 2800. You can also choose to add extra opacity (by selecting a high opacity face film), extended outdoor durability, and

Avery Dennison Easy Apply™ and Easy Apply™ RS technology for easier application. There's a choice of adhesives to find the right product for the best application experience.

For a perfect partnership, use the matching protective DOL overlaminating film and give your application the finish - matt, gloss or lustre - required.

KEY FEATURES

MPI 2000 series

- High performance
- Printed material warranted for five years*
- Covered by ICS Warranty Program
- Printable on all major platforms
- Matching overlaminates available
- Hi-Tack adhesives can be used on more challenging surfaces
