

ROLL UP COMPACT

Tension of the spring mechanism

1 - Remove the top lid by unscrewing the top two screws from the left and right sides.

2 - Carefully remove the leader from the roll.

3 - Unfold the stabilizing foot. Place your palms at the outer ends of the roll. Tension the spring mechanism 39 turns by sliding your palms forward.

4 - Make sure the adhesive on the roll is facing up and lock the spring mechanism with the locking pin.

5 - Replace the leader on the roll over the existing adhesive and press firmly.

6 - Apply packing tape over the joint if necessary.

7 - Replace the top lid and tighten the screws on both sides. READY!
